CONTROL PANELS

controls

OVERVIEW

Convenient and ready-to-connect, WATTCO™ control panels include temperature, power, multi-loop, process, and safety limit controllers. Designed for electric heaters, control panels are composed of switching devices, fusing, and internal wiring. Control panels can be custom designed to meet the requirements of your application.

BENEFITS

- » Reliable
- » Cost effective
- » Ready-to-connect
- » Compatible with different materials (dust, oil, water, corrosive, dangerous materials)

The following sections will help you select the WATTCO™ control panel that meets the requirements of your application.

Please call us at **1-800-4WATTCO (1-800-492-8826)** for further assistance.

KEY FEATURES

- » Control panels with voltages up to 4000 amps, 600V
- » Basic model: TE (remote mounted controls available upon request)
- » Fully-equipped models:
 - Contactor power switching
 - Stage contactor
 - Solid state switching
- » Package includes:
 - Design drawings
 - Bills of material
 - Replacement parts
 - Operating instructions
 - Component manuals

EXTRA FEATURES

- » Remote set point
- » Proportioning
- » Process variable retransmission
- » Alarms
- » Remote annunciation
- » Dual energy and peak load controls
- » Current/voltage/wattage metering and interfacing PLCs
